Call for Papers

The Third IEEE Conference on Telepresence, **TELEPRESENCE 2026**, will be held on 9-13 November 2026 at the University of the West of England, Bristol, United Kingdom. The conference will provide a stimulating forum for researchers, educators, and practitioners to learn, share knowledge, report the most recent innovations and developments, and exchange ideas and advances in all aspects of telepresence systems and applications, telerobotics, haptics, human-machine interfaces, learning from humans, and autonomy. Integrative approaches are particularly welcome. TELEPRESENCE 2026 will feature keynotes and invited talks, industry panels, special sessions, and exhibits to enrich fruitful discussions. In addition to impactful technical interactions, Bristol offers attendees significant opportunities for social and cultural interactions. Contributions to theory and practice, including but not limited to, the following technical areas, are invited:

Technological Infrastructure and Systems

- Remote Collaboration
- Virtual Reality (VR) Integration
- Augmented Reality (AR) Applications
- Haptic Feedback Technology
- 3D Tele-immersion
- Cross-Platform Compatibility
- Teleoperation Systems
- Real-Time Communication
- Low Latency Networking
- Spatial Audio Technology
- Wireless Control Systems
- Sensor Fusion for Robotics
- Robotic Actuation Techniques
- Internet of Things (IoT) Integration
- Cloud Computing for Telepresence
- 5G and Advanced Networking
- Cybersecurity in Telepresence
- Edge Computing in Telepresence
- Digital Twins and Simulation
- Biometric Authentication
- Wearable Technology
- Machine Vision and Perception
- Advanced Image and Video Processing
- Environmental Sensing Technologies
- Virtual Meeting Spaces
- Quantum Computing Applications
- Collaborative Virtual Environments
- Scalability Solutions for Telepresence Systems
- Sustainable Design in Telepresence Technology

Human-Computer Interaction and User Experience

- Gesture Recognition
- Brain-Computer Interfaces (BCI)
- Voice User Interfaces (VUI)
- Multi-Modal Interaction
- Ergonomic Design
- Assistive Technologies
- Augmented Reality Interfaces
- Virtual Environments Interaction
- User Experience (UX) in HCI
- User Interface (UI) Design
- Behavioral Modeling
- Ethnographic Data Analysis
- Cognitive Modeling
- Psychology of Human-Computer Interaction
- Social Presence in Virtual Environments
- Data Privacy and Ethics
- Accessibility in Telepresence
- Adaptive User Interfaces
- AI-driven Personalization
- Human-Centered Machine Learning
- Interactive Machine Learning

Multi-Perception Integration of Data Sources

Approaches combining more than one perception source

Integrative Approaches

Contributions applying autonomy and intelligent systems approaches in Human-Computer Interaction and User Experience topics

Contributions adding interactive and responsive elements to Autonomy and Intelligent Systems

Autonomy and Intelligent Systems

- Autonomous Navigation
- Human-in-the-Loop Control
- Telepresence Robots
- Long-Distance Robotic Control
- Autonomous Decision Making
- Self-Learning Systems
- Robotics and Automation
- AI Ethics in Autonomy
- Intelligent Control Systems
- Swarm Intelligence
- Autonomous Agents and Multi-Agent Systems
- Self-Regulating Systems
- Predictive Analytics for Autonomy
- Empirical Studies in Human Learning
- Natural Language Processing (NLP) for Human Learning
- Human Feedback in AI
- Human-in-the-Loop Learning
- Haptic Interfaces for Telerobotics

Timeline

Special Session Proposal Deadline: May 15, 2026
Special Session Proposal Acceptance: May 22, 2026
Full Paper Submission: June 12, 2026
Full Paper Acceptance: July 17, 2026
Short Paper/Abstract/Demo Deadline: August 3, 2026
Short Paper/Abstract/Demo Acceptance: August 24, 2026
Camera-ready Submission Deadline: September 4, 2026
Early-Bird Registration: August 10, 2026
Competition Date: November 13, 2026

Organizing Committee

General Chairs:
Giacinto Barresi, UWE Bristol, UK
Antonia Tzemanaki, University of Bristol, UK
Tiago H. Falk, INRS-EMT, Canada

Program Co-Chairs:
Hang Su, University Paris-Saclay, France
Wen Qi, South China University of Technology, China
Marta Lorenzini, IIT, Italy

Finance Co-Chairs:
Martin Pearson, UWE Bristol, UK
Marianthi Leon, UWE Bristol, UK

Special Session Co-Chairs:
Sara Falcone, Pace University, USA
Neal Lii, DLR, Germany
Ning Wang, Sheffield Hallam University, UK

Satellite Chair: Chenguang (Charlie) Yang, HKPU, HK

Sponsorship Co-Chairs:
Liang He, University of Oxford, UK
Xinyi Tu, Aalto University, Finland
Francesco Scotto Di Luzio, Campus Bio-Medico, Italy
Laura McGann, Case Western Reserve, US

Outreach Chair: Yonas Tefera, IIT, Italy

Advisory Board Members:
Matthew Studley, UWE Bristol, UK
Lars Kunze, UWE Bristol, UK
Arthur Richards, University of Bristol, UK

Overall Conference support:
David Magnoni, IEEE Future Directions, USA

...and more at https://conf.telepresence.ieee.org/

Financial Sponsor: IEEE Future Directions Initiative on Telepresence
Technical Co-Sponsors: IEEE RAS TC on Telerobotics, IEEE RAS TC on Neurorobotic Systems, IEEE SMC TC on Brain-Machine Systems, and IEEE SPS Autonomous Systems Initiative Committee.

TELEPRESENCE 2026 will be an in-person event, with a Satellite in Hong Kong and potentially other locations (TBD). Authors can submit full technical papers (6 pages) and short technical papers (4 pages), that if accepted and presented at the conference, will be published in IEEE Xplore. Physical demonstrations associated with the papers are encouraged. Abstracts may also be submitted for authors who do not yet have publishable results but want to present late-breaking news such as their latest results and works in progress. Accepted abstracts will be presented at the conference but **will not** appear on IEEEXplore.
